

Recherche textuelle

Christophe Philémont - 2026-04-22 - [Navigation](#)

Pour chercher un dossier ou un fichier dans toute l'arborescence.

1 - Cliquer sur "Aplatir"

2 - Tapez votre recherche

The screenshot shows the ID ALL interface. On the left is a file explorer tree with folders like 'Dossier 1', 'Dossier 2 - Visiobat (A supprimer)', and 'Sous-dossiers'. At the bottom of this tree is a button labeled 'Aplatir' (Flatten), highlighted with a red box and the number '1'. On the right is a search results table with columns 'Nom' and 'Rév.'. At the top of this table is a search input field labeled 'Rechercher dans le dossier...', highlighted with a red box and the number '2'. The table lists various files and folders, many with a 'TRASH' suffix. At the bottom right of the interface, it says '45 Documents'.
